

Vaccine Assist Programme

What is the vaccination process?

- 1 You have to register on the electronic vaccination data system
- 2 When it is your turn to be vaccinated, you will get an SMS with details of your vaccination appointment
- 3 At your appointment, you have to show your unique SMS code, your ID document, and your medical aid details if you are insured
- 4 You will receive an injection in your arm once you have signed consent
- 5 When it is time for your second dose, you will receive a second SMS and follow the same procedure as before
- 6 After your second dose, you will be able to access an electronic vaccination certificate to prove you are vaccinated

We're here to help you through every step of the process
